How Would You Steal a Computer?

Imagine you are trying to steal a computer from a university classroom.

Let us hear your ideas, no wrong answers.

- How would you do it?
- What should you avoid?
- How would someone detect the theft?

12 Week Cybersecurity Bootcamp

PREWORK

Labs and reading assigned, to be completed **before** each lecture

1

LECTURE

Weekly 1-hr lecture
Wednesdays including discussions hands-on exercises.

2

TA HOURS

Suleyman will host office hours to assist with homework and questions.

3

SOFT SKILLS

Patricia will bring guest speakers to help you improve your job search and prepare for the job market.

4

12-WEEK SYLLABUS OVERVIEW

WEEK	MODULE TITLE	KEY TOPICS & CONCEPTS	TRACKS
WK 0	Onboarding	Pre-requisites, access, ZaKey intro, bootcamp intro, TryHackMe, security basics	ALL TRACKS
WK 1	Security Mindset & Attacker Thinking	CIA triad · Threat modeling intro · Why technical roles are first line of defense	ALL TRACKS
WK 2	Cryptography Fundamentals	Hashing · Encryption · Signing · Symmetric/Asymmetric · TLS/PKI · Certs	APPDEV / SECENG
WK 3	SOC Analyst & Threat Intel	SOC Tiers · Workflow · Alert Triage · Why TI Matters · CyberChef	SOC / SECENG
WK 4	Identity & Web App Security	AuthN/AuthZ · MFA · SSO · Least Privilege · OAuth · JWT · OWASP Top 10	APPDEV / SECENG
WK 5	AI Security	LLM attack surface · Prompt injection · Data poisoning · OWASP LLM Top 10	APPDEV / SECENG
WK 6	Endpoint, SIEM & Forensics	Windows processes · Sysmon · EDR · Log ingestion · DFIR overview	SOC / SECENG
WK 7	Cloud & SaaS Security	Shared responsibility · IAM in cloud · SaaS risk · Misconfiguration risks	APPDEV / SECENG
WK 8	Governance, Risk, and Compliance	NIST/ISO frameworks · HIPAA/SOC 2/PCI basics · Prioritization · Communicating risk	ALL TRACKS
WK 9	Threat Modeling & Capstone	STRIDE methodology · Defensive validation · Typo Snare threat hunt	ALL TRACKS
WK 10	Career Day	Resume & portfolio · Interview prep · Job search · Career path guidance	ALL TRACKS
WK 11	Capture the Flag	Security capture the flag with prizes!	ALL TRACKS

Graduation Criteria

Attendance

Attend at least 70% of the lectures

Career Day

Participate in Week 11 Career Day

Complete prework

Complete at least 75% of Google Classroom assignments

Soft Skills Guest Speaking Sessions

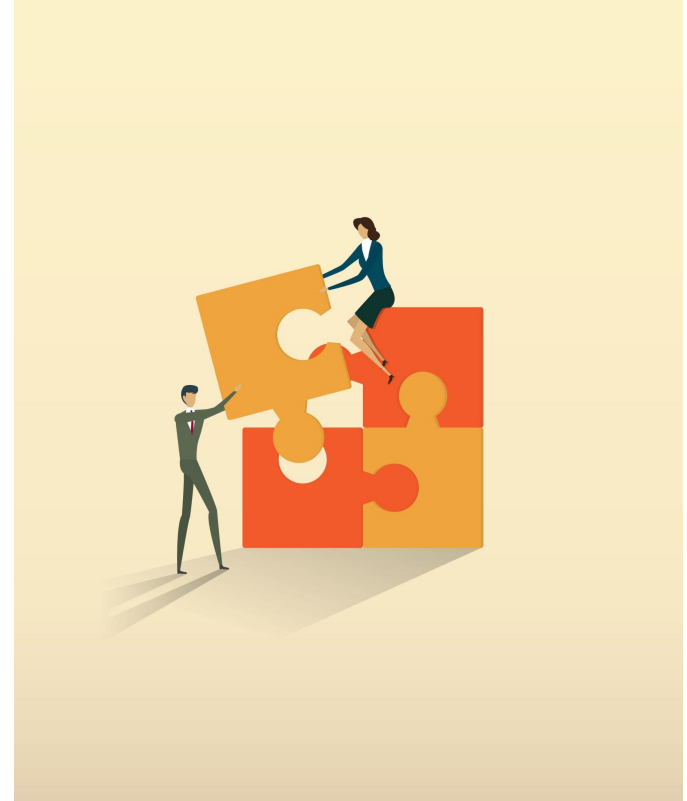

A successful cybersecurity career requires more than technical expertise. These soft skills sessions will help you build the confidence, mindset, and professional toolkit to turn your technical knowledge into real-world opportunities.

We will explore practical topics including:

CV drafting, job search strategies, LinkedIn and networking, mental resilience, technology leadership, and technology culture.

Through practical and engaging sessions, you'll learn how to communicate your strengths, build meaningful professional connections, navigate challenges, and understand what it takes to thrive in technology environments.

live every Wednesday at 12:00pm Palestine time for the duration of the course.

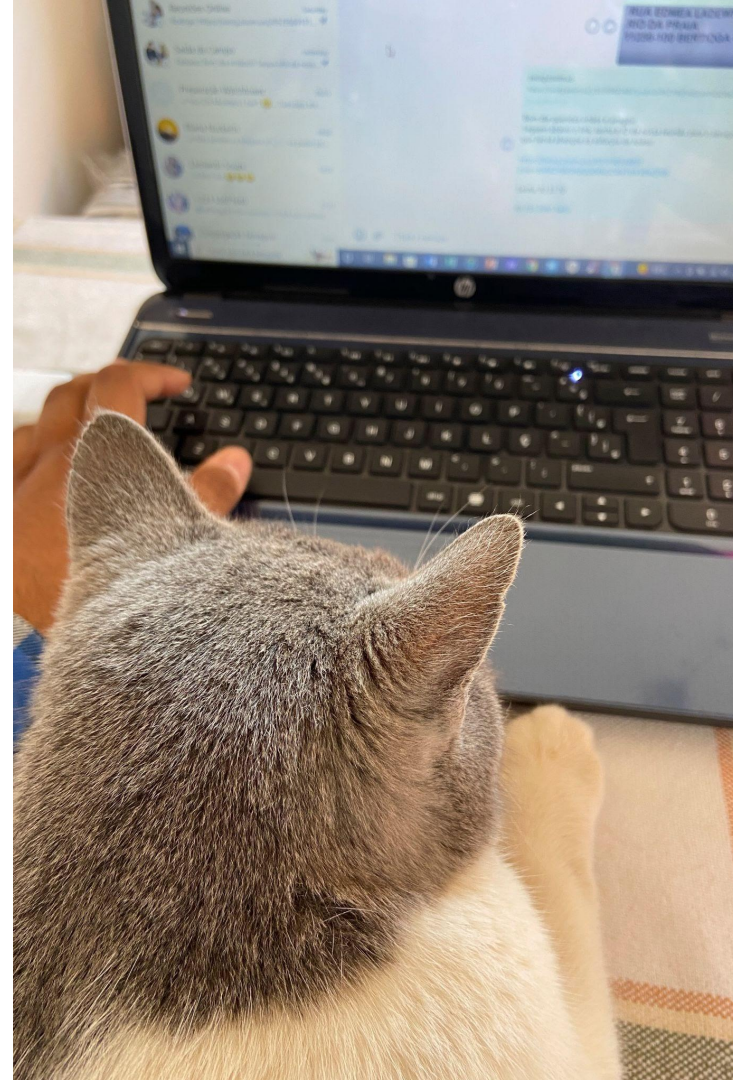

Live Sessions

Live Lecture Hours:

Every **Thursday, at 2 pm**, Jerusalem Time

Meeting link:

Self-Check

If you can answer at least three of these five questions in under 30 seconds without looking anything up, you're ready:

1. What's the difference between TCP port 80 and 443, and what protocol speaks on each?
2. In Linux, how do you find which process is listening on a given port?
3. In Windows, how do you list scheduled tasks from PowerShell?
4. What is the difference between DNS and DHCP?
5. What HTML tag is used to include javascript in a page?
